-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 21 March 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3, 20, 27, 28, 34, 67, and 69-71 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. In claims 1 and 67, the limitation "within the left ventricle" is unclear because electrodes are not typically implanted "within" the ventricle itself due to possible complications, and claims 34 and 71 further limit the electrode "within" the ventricle to be in the coronary vein. The Examiner is interpreting the coronary vasculature to be "within" the left ventricle.

4. In regards to claim 27 is unclear whether the claims set forth new electrodes, or whether the claims further limit the electrodes set forth in claim 1.

5. In regards to claims 34 and 71, it appears that the limitations drawn to the first and second electrodes should be swapped.

6. In regards to claim 2, it is unclear how the ventricular electrodes sense atrial activity.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1-3, 20, 27, 28, 34, 67, and 69-71 are rejected under 35 U.S.C. 102(a/e) as being anticipated by Yu et al. (US 2003/0105496, hereinafter "Yu").
9. In regards to claims 1, 27, 34, 67, and 71, Yu discloses providing a first electrode to the left ventricle coronary vein, a second electrode to the septum, and performing intrachamber resynchronization with the electrodes (pars. 0013, 0027 and 0035).
10. In regards to claim 2, Yu discloses receiving depolarization signals from the atrium (par. 0025).
11. In regards to claims 3 and 69, Yu discloses receiving signals from multiple left ventricular sites (par. 0028).
12. In regards to claims 20 and 70, the electrodes are endocardial electrodes (Fig. 3).
13. In regards to claim 28, delivering includes providing a lead through the SVC, RA, ostium of the coronary sinus, and coronary vein (par. 0027 and Fig. 3).

#### ***Response to Arguments***

14. Applicant's arguments with respect to claims 1-3, 20, 27, 28, 34, 67, and 69-71 have been considered but are moot in view of the new ground(s) of rejection, necessitated by amendment.

***Conclusion***

**15.** Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **MICHAEL KAHELIN** whose telephone number is (571)272-8688. The examiner can normally be reached on **M-F, 8-4**.
